SUMMARY

Enthusiastic engineering student pursuing a B.Tech in Computer Science with a strong coding foundation in C, C++, and Python. Adept at full-stack web development, particularly skilled in the MERN stack (MongoDB, Express.js, React, Node.js). Proven track record of successfully completing multiple web development projects. Actively expanding skill set, with a keen focus on mastering AI technologies. Eager to leverage coding expertise and web development proficiency in future opportunities.

EXPERIENCE

Had participated in many hackathon and competitive Programming competition Seeking for new opportunities to come

EDUCATION

Bachelor of Technology

LNCT Group of Colleges

📅 2022 - Present 📍 Bopal, Madhya Pradesh

12th

Takshashila Public School

📅 2020 - 2021 📍 Shahjahanpur, Uttar Pradesh

10th

Takshashila Public School

📅 2018 - 2019 📍 Shahjahanpur, Uttar Pradesh

PROJECTS

Chat gpt

This React application mimics the functionality of Chat-GPT, allowing users to ask questions and receive responses powered by the OpenAI API. Experience the magic of conversing with an AI model in a simple chat interface.

Chat-app

This MERN (MongoDB, Express.js, React, Node.js) application offers a complete chat experience with features such as user authentication using JWT, Firebase authentication for Gmail, Facebook, and GitHub logins, avatar customization, real-time chat functionality via Socket.IO, and the ability to send emojis to other users.

Blog-web-app

This feature-rich application provides a complete blogging experience with user authentication using JWT. Users can explore blogs created by others, search for specific blogs, read and comment on posts, update and delete their profiles, and create, update, and delete their own blogs with titles, categories, images, and detailed descriptions.

React redux shop app

This React-Redux application provides a dynamic e-commerce interface where users can explore various products displayed in card components. The site features Home and Cart tabs, allowing users to navigate seamlessly. Enhance your shopping experience by adding products to the cart, complete with a toast notification for a delightful user interaction.

STRENGTHS

Problem Solving

Adept at problem-solving, I leverage analytical thinking to break down complex issues into manageable components. This enables me to develop effective solutions and navigate challenges efficiently, ensuring successful outcomes in various situations.

Project Management

With a strong foundation in project management, I excel in coordinating tasks, managing timelines, and overseeing project lifecycles. My organizational skills and attention to detail contribute to the seamless execution of projects, from inception to successful completion.

Innovation

I bring an innovative mindset to every challenge, constantly seeking creative solutions and thinking outside conventional boundaries. This approach allows me to contribute fresh perspectives and ideas, fostering a culture of continuous improvement.

ACHIEVEMENTS

Participated in many hackathons and competitive programming compitions

Successfully completed many open source project
